A COMMUNITY OF LOW CARBON INNOVATORS

Sustainable Bridges is a community of green innovators with an objective to nurture and champion the successes of its resident ventures. Membership offers the opportunity to work alongside some of London's most promising green innovations.

Powervault

Crowdfunding favourite (£750k in 3 ½ days!) Powervault are seeking to disrupt the energy storage market by developing and selling a user-installable energy storage device. Patent-pending Powervault enables households to use more of the electricity generated by their decentralised technologies.

SafetyNet

SafetyNet's award winning trawling system exploits fish behavioural habits and physiology via pioneering lighting applications to enable more sustainable fishing practices across the globe, with work underway to utilise the technology as part of Horizon 2020.

E-Car Club

The UK's first wholly electric vehicle pay-per-use car club offers a cost-competitive and environmentally friendly transport solution for communities, with clubs established in 10 locations across the UK and social investment from Ignite Social Enterprise.

ENTREPRENEURIAL LEARNING

Workshop sessions leveraging onsite entrepreneurial expertise to cultivate key skills

COMMUNITY ACTIVITIES

Provide informal networking time to bounce ideas off fellow members

EVENTS PROGRAMME

Drawing in an extensive range of connections from across London's green ecosystem

Leveraging entrepreneurial expertise to enable more low carbon ventures to benefit from a shared working space and more opportunities for collaboration.

Supporting and showcasing green entrepreneurship, members can work alongside other pioneers with a diverse range of backgrounds. Ultimately, choosing to locate at Sustainable Bridges offers the chance to participate in a pioneering initiative at the forefront of sustainability.
